Sooji Oh
Violin

Young Park
Piano

Hana Chu
Piano

On September 24, 1982, the government of China signed an international agreement not to force refugees back to their homeland if they would face persecution. Despite rising international concern, the government of China continues to force North Koreans back to their homeland to face certain persecution, torture and even death. Their inhumane policy has also led to a horrific situation for North Korean females: eighty percent become victims of traffickers.

The North Korea Freedom Coalition invites you to join us to save the lives of North Korean refugees.
